

## Plan Element Subcommittee

Prior to commencing work on a comprehensive plan elements, Plan Element Subcommittees (PES) of the CPAC will be created to facilitate the gathering of information, data analysis and proposed outcomes regarding that planning element. The sub-committees will contain membership of citizens, local officials, business representatives and local organizations within the County with interest in the particular planning element.

For the purpose of the Comprehensive Plan, following PES's have been identified to be formed. These six subcommittees will work on their topics extensively, with assistance from the County staff and bring their products to CPAC for further review and inclusion in the Comprehensive Plan document.

Citizens can become a part of a PES by contacting the Emmet County Planning staff and expressing their interest in a particular subject. The staff will then create the member list, coordinate the meetings and give direction to the members, playing the role of a link between the various committees and subcommittees.
